

Dr Hubble's Brilliant Bubble Show

a science incursion to inspire students and enhance the science curriculum

Dr Hubble the Bubbleman, played by Shep Huntly Shepard, is a circus and variety entertainer with 30 years of experience on stages around the world, including the Sydney Opera House and National Theatre of London.

Dr Hubble uses the magical world of bubbles to introduce and explore scientific concepts such as gravity, evaporation, light refraction and atmospheric gases. Students gasp in wonderment as they watch the biggest bubbles they have ever seen!

Students will make predictions and observations, and learn team-building and cooperation as they participate in hands-on activities like keeping bubbles alive – with a subtle message of sustainability amidst the bubbly joy.

"Students and staff loved this performance. It was something different and truly wonderful! Highly recommended – 10 out of 10!" Jeanette, Teacher

"The children were amazed, engaged and entertained. We will definitely have you again!" St Finbarr's PS, Brighton VIC
